

## Certificate of Attendance

We hereby confirm that **Sascha Berrang** participated in the following webinar (online seminar):

- **"Learning Theory: A Review / Part 2"**

*At its best, animal training is informed by science. Many branches of science are relevant, including veterinary medicine, ethology, neurology and anatomy. But most essential for professional dog trainers is the psychology of learning and motivate on. We'll examine the underlying principles of both operant and classical conditioning, along with several laws of learning, emphasizing their practical implications for best training practices.*

*Attendees will learn about the following topics:*

- *Extinction and its Limitations*
- *Schedules of Reinforcement*
- *The Premack Principle as a Practical Training Tool*
- *Maximizing the Power of Clickers & Other Event Markers*
- **Speaker: Kathy Sdao, MA, ACAAB**
- **CEUs: 2 Points for KPA, IAABC and CCPDT**
