

## Certificate of Attendance

This is to confirm, that **Sascha Berrang** participated in the following webinar (online seminar):

- **"Impulse Control Part 2"**

This webinar continues building from Part 1 by looking at the biology of dogs and examining recent research on impulse control in dogs. We will identify real life reinforcers for behaviour deficits identified in Part 1 that keep a dog doing undesired behaviours and how to use them to teach the dog to calm himself. Learn which impulse issues are common at each stage of life, and more games you can play to minimize them. In this webinar, you again get a chance to work with your dog and report back on his behaviour. Discover what calming tools and other resources are available to help dogs with impulse control issues.

- Speaker: **Donna Hill, B.Sc. B.Ed**
- CEUs: 2 Points for IAABC and CCPDT
